

The 100% Renewable Energy System

Business Ecosystem:

Flexens, with its roots in the extensive research programme led by the Finnish government during 2010-2016, was founded in 2018 to become the platform company for the energy sector in Finland, offering unique know-how and technical expertise to the growing global renewable energy market.

The current ecosystem comprises 26 companies

In addition to the Business Ecosystem Flexens cooperation network include:

- Research institutes
- International networks
- Local co-operating partners in Åland
- Shareholders; Flexens' owners provide both industrial advice and strategic business development support
